Subject: RE: HCRH NSA Permit Application - Viento to Mitchell Point (Segment E) and Mitchell Point Crossing (Segment F) - Agency Support

Kevin,

Thanks for the e-mail.

We can acknowledge that this project partially occurs on NFS lands and that Hood River County is completing the review for consistency with the Management Plan for the CRGNSA.

This e-mail does not document our endorsement of all of the elements of the design at this point. We will have our staff continue to work with the applicant on design elements for the final product.

Thanks,

Casey Gatz

Hi Casey,

With Robin Shoal out of the office this week I am hoping that you can respond to this message and acknowledge that the Viento to Mitchell Point (Segment E) and Mitchell Point Crossing (Segment F) State Trail projects cross USFS property and that you support the projects as I outlined in my original message below?

Please let me know if you have any questions.

Thank you!

Hello Robin Shoal and Robin Wilcox,

Earlier this week Molly and I met with Eric Walker and Nick Kraemer of Hood River County for our completeness review meeting on our NSA Permit Application for the construction of the Viento to Mitchell Point (Segment E) and Mitchell Point Crossing (Segment F) projects.

One item that we need to add to the application is documentation from the USFS and OPRD acknowledging the project that partially occurs on their properties. Nick and Eric said that an email message from each of you would be all that they would need.

I'm hoping that you can reply all to this message with your acknowledgement of the projects this coming week.

Let me know if you have any questions.

Thank you!

Yes, this connection project does cross several areas that is owned and managed by The Oregon Parks and Recreation Department. We are aware of the project and support this work.

Kevin-

Yes, this project takes place on OPRD property. In case you need someone with more authority to acknowledge the project, I've cc'd our Deputy Director and District Manager. Their acknowledgement probably holds a lot more weight than mine.
